Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 14 April 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 and 5-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Perez et al. (US 6,449,870). Perez is considered to disclose the claimed invention comprising:

an air outlet aperture **28** across which there is situated at least one thermal-capacitance element **68** to moderate changes in temperature of air exhausted through the nozzle **60** wherein the disclosed parallel vanes is considered to anticipate the claimed nozzle because both direct airflow through a restriction (please see column 6 lines 5-62 for the considered disclosure with respect to the claimed temperature moderation). Perez is also considered to disclose the claimed element has opposed ends and the outlet aperture has slots therein into each of which a respective said opposed end is received as shown in figures **1** and **4**, the nozzle being formed integrally with a hairdryer body or 1 being formed as an attachment for a hairdryer body as shown in figure **1**,

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3749

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148

USPQ 459 (1966), that are applied for establishing a background for determining

obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

Claims 3 and 4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Perez. Perez is considered to disclose the claimed invention, as discussed above under the anticipatory rejection, except for the claimed element material and pair thereof. It would have been an obvious matter of design choice to combine the teachings of Perez with specific element material and pair thereof, since applicant has not discussed the patentable distinction of those claimed features found in the prior art cited with this action.

Claims 7-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Perez in view of Cantor (US 6,094,837). Perez is considered to disclose the claimed invention, as discussed above under the anticipatory rejection, except for the claimed comb teeth extension. It would have been an obvious matter of design choice to combine the teachings of Perez with comb teeth extension, considered to be taught in Cantor at column 4 lines 14-49, for the purpose of allowing hair dryer manipulation of the drying subject intended to be transactionally related.

Art Unit: 3749

**Conclusion**

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. References C through E, cited in this action are considered to disclose hair dryer temperature regulation.
